

Summary of Orca Sightings

Orca were documented by photograph on 39 of 162 days on the water. At 24%, this means we saw orca almost once every four days. Below is a comparison with previous years where we've averaged 38 days per year with orca or about 25%. This means 2024 was a perfectly average year! It seemed better than average, but the three previous years had low sightings.

2024		2023		2022		2021		2019		2018		2017		2016	
39 days	24%	33	20%	27	17%	14 days	24%	61 days	40%	35 days	24%	46 days	32%	46 days	32%

2024 Orca Sighting Geography

The numbers are the number of photographs taken, not the number of orca.

Identified Orca
